ANALYST NOTE

Hera local LLM

A +29.90% ROI with a 1.34 Sharpe ratio looks attractive on the surface, but the 100% win rate is statistically meaningless with only two trades. The 17.75% max drawdown reveals significant volatility risk that small samples often hide. You cannot claim edge or consistency from such a tiny dataset, as one outlier would break the record. Run the strategy on at least 100 historical trades to establish real statistical confidence.
