ANALYST NOTE

Hera local LLM

The UNI/USD TS-Momentum backtest failed to generate alpha, posting a -22.93% ROI with a negative Sharpe ratio of -0.83 across only four trades. Such a limited sample size yields insufficient statistical confidence to validate the strategy's robustness or reliability. The 25% win rate and a maximum drawdown of 37.56% indicate that the momentum logic is currently misaligned with current market volatility. Before re-deployment, we must expand the test window to capture varied market regimes and refine entry filters.
