ROI	Sharpe	Win Rate	Max Drawdown
+40.41%	1.10	66.7%	-21.82%

EQUITY CURVE202 sessions · starting at \$10000.00

ANALYST NOTE

Hera local LLM

The +40.41% ROI and 66.7% win rate suggest positive alpha, but the three-trade sample is statistically insignificant for institutional confidence. A Sharpe ratio of 1.10 is respectable, yet it lacks robustness due to the minimal data points. The 21.82% max drawdown is excessive relative to the returns, indicating poor risk-adjusted performance. We need to validate this strategy over a larger historical dataset to ensure the signals are not merely noise. Expanding the backtest to at least fifty trades is the critical next step before any capital allocation.
