ANALYST NOTE

Hera local LLM

The +18.35% return on ASC is entirely anecdotal due to the three-trade sample, rendering the 0.82 Sharpe ratio statistically insignificant. A 66.7% win rate offers no predictive power without a larger dataset to validate consistency. The 17.18% drawdown is acceptable but irrelevant given the negligible sample size. Run a 12-month backtest with at least 50 trades to establish statistical confidence.
