ROI	Sharpe	Win Rate	Max Drawdown
-32.73%	-1.13	0.0%	-45.89%

EQUITY CURVE202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

This backtest for VOXR is fundamentally broken, with a 0.0% win rate and a devastating 32.73% loss indicating total signal failure. The negative Sharpe ratio of -1.13 confirms that the strategy generated consistent losses rather than risk-adjusted returns, while the 45.89% drawdown highlights severe capital erosion. With only four total trades, the sample size is statistically insignificant, meaning these results likely reflect noise or a defective entry logic rather than a viable market edge. The primary failure was the complete absence of profitable exits, suggesting the EVO_EVOEVOEVOE_v2183 parameters are misaligned with current volatility. You must immediately halt this configuration and re-derive your entry and exit
