ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v1937 strategy failed catastrophically on VOXR, recording zero winning trades and a 45.89% maximum drawdown over a sample of only four executions. With a Sharpe ratio of -1.13 and a -32.73% return, the statistical confidence is negligible due to the extremely low trade count, rendering the result a clear outlier rather than a robust signal. The strategy appears overly sensitive to price volatility, triggering stop-losses before any trend confirmation could materialize. We must immediately pause deployment and recalibrate entry filters to avoid capital erosion on such illiquid or volatile tickers.
