ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOG_v506 strategy on VOXR failed catastrophically, delivering a -2.01% ROI with a negative Sharpe ratio of -0.05 amidst an 11.32% drawdown. With only three trades executed, the statistical signal is too weak to draw meaningful conclusions about the strategy's efficacy or robustness. The 33.3% win rate suggests the entry logic is fundamentally misaligned with current market microstructure for this specific asset. Before reallocating capital, rigorous walk-forward analysis across multiple market regimes is required to validate whether the loss is due to parameter instability or a broken hypothesis.
