-5.59%	-0.31	0.0%	-14.78%

EQUITY CURVE

202 sessions · starting at \$10000.00

ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v538 strategy on RDN failed catastrophically with a -5.59% return and a 0% win rate across only three trades. Such a small sample size renders any statistical significance meaningless, while the negative Sharpe ratio of -0.31 and 14.78% drawdown indicate severe underperformance relative to capital at risk. The bot likely entered positions during a period of high volatility or misaligned trend direction without adequate filtering. Immediate action requires pausing deployment to debug signal logic and expanding the backtest window to validate robustness before retesting.
