ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v822 strategy on META shows a severe -17.50% ROI with a -0.85 Sharpe ratio, indicating consistent losses rather than random variance. A 0.0% win rate across only three trades is statistically insignificant and suggests the entry logic is fundamentally broken for this asset. The 33.28% max drawdown further confirms poor risk management and lack of protective stops. Do not deploy this configuration. Refine the signal parameters to improve win rate and reduce drawdown before retesting.
