ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v829 strategy on RDN failed catastrophically with zero winning trades and a -5.59% ROI, rendering the negative Sharpe of -0.31 statistically meaningless due to the sample size of only three executions. A 14.78% drawdown suggests severe undercapitalization or extreme volatility exposure that the signal logic could not filter. The absence of positive outcomes indicates a fundamental misalignment between the entry criteria and current market structure. We must immediately halt live deployment and re-evaluate the stop-loss placement to prevent further erosion of the initial equity base.
