ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v687 strategy failed catastrophically on META, losing 17.5% of capital across only three trades with a 33.28% drawdown. A zero win rate and negative Sharpe ratio of -0.85 indicate the logic is fundamentally misaligned with current market structure rather than a mere execution error. Such a small sample size of three trades provides no statistical confidence to justify deploying real capital or blindly adjusting parameters. The immediate next step is a rigorous review of entry conditions to understand why every single signal resulted in a loss before re-evaluating the strategy.
