ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v867 strategy on VOXR is statistically irrelevant given only three trades, producing a non-significant -2.01% drawdown. A negative Sharpe of -0.05 and a 33.3% win rate suggest the logic fails to capture consistent alpha under current market regimes. The strategy is overfitted to noise rather than demonstrating robust edge, rendering the loss of capital meaningless in a live context. We must expand the sample size by adjusting lookback periods or switching to a different asset class before re-evaluating viability.
