ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1622 strategy on VOXR failed catastrophically with a -2.01% ROI and negative Sharpe ratio, driven by only three trades. A win rate of 33.3% and 11.32% drawdown indicate severe undercapitalization or poor execution logic rather than a robust signal. With merely three data points, statistical significance is nonexistent, rendering any trend analysis invalid for institutional deployment. Immediate parameter re-optimization or strategy abandonment is required before further capital allocation.
