ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1260 strategy on RDN failed catastrophically with zero winning trades and a negative Sharpe ratio, indicating a severe lack of statistical significance due to the tiny sample size of three losses. This extreme drawdown of nearly 15% suggests a fundamental flaw in the entry logic rather than normal market noise. Consequently, any confidence in this strategy is nonexistent, and immediate parameter re-optimization or complete strategy abandonment is required before re-deployment.
