ANALYST NOTEHera local LLM

The EVO_EVOEVOEVOE_v2379 backtest on VOXR shows a sharp -2.01% drawdown with a negative Sharpe of -0.05, driven by only three executed trades. A 33.3% win rate suggests the signal logic lacks edge on this specific ticker, as losses outweighed gains in this tiny sample. Statistical significance is impossible here; three data points cannot validate or invalidate the strategy's core mechanics. The strategy needs more historical data to confirm if this underperformance is an outlier or a systemic flaw. Next, expand the backtest window or switch to a different asset to validate signal robustness before deployment.
