ANALYST NOTE

Hera local LLM

The JMSB backtest shows a +13.59% ROI with a 66.7% win rate, yet the statistical confidence is negligible due to only three total trades. The 1.05 Sharpe ratio and 6.58% max drawdown suggest reasonable risk adjustment, but the sample size is too small to validate the GG3_MACD_Momentum logic reliably. Any observed performance could easily be noise rather than a genuine edge in the market. We must increase data granularity or extend the lookback period to gather enough trades before deploying live capital.
