ANALYST NOTEHera local LLM

The SUSHI/USD TS-Momentum strategy generated a -40.97% ROI with a 0% win rate, indicating a complete failure to capture any profitable opportunities over the sample period. With only two trades executed, the statistical confidence in these metrics is negligible, and the -1.99 Sharpe ratio confirms a severe negative risk-adjusted return profile. The strategy failed to identify a single directional move correctly, resulting in a maximum drawdown of 44.36% that erodes capital faster than the system can recover. Given the lack of statistical significance and the overwhelming loss, the immediate next step is to halt the strategy and re-evaluate the momentum thresholds for this specific asset class.
