ANALYST NOTE

Hera local LLM

The RDN backtest for EVO_EVOGG1RSIS_v439 failed catastrophically, yielding a -5.59% ROI with zero winning trades and a -0.31 Sharpe ratio. With only three trades executed, the sample size is statistically insignificant and prone to high variance, rendering the -14.78% drawdown unrepresentative of long-term performance. The strategy likely suffered from severe overfitting or a complete regime break in the current market structure, as indicated by the lack of positive signals. Immediate recalibration of entry logic and a broader test across multiple assets are required before redeployment.
