ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v580 backtest on RDN failed catastrophically, showing a -5.59% return with zero wins and a -0.31 Sharpe ratio across just three trades. Such a tiny sample size provides no statistical confidence; the result is likely noise rather than a consistent strategy failure. The -14.78% drawdown suggests the logic lacks proper risk controls or misreads current volatility. Immediate next steps involve recalibrating entry filters or expanding the testing period to gather sufficient data before redeployment.
