ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v654 strategy on VOXR failed significantly, recording a negative ROI and a non-positive Sharpe ratio, indicating a complete lack of risk-adjusted returns. With only three trades executed, the statistical sample size is insufficient to validate the logic, rendering the 33.3% win rate and 11.32% drawdown statistically insignificant noise rather than a reliable signal. The strategy generated negative alpha, losing capital in every phase of the simulation, and currently offers zero confidence for live deployment. Before considering any modifications, you must execute a new backtest with a longer historical window to gather a robust sample size. Do not trade this bot until the equity curve demonstrates stability and the Sharpe ratio is
