ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v856 backtest on RDN failed catastrophically, recording zero winning trades and a negative Sharpe ratio of -0.31. With only three total trades executed, the sample size is statistically insignificant, rendering any observed drawdown of 14.78% unreliable as a performance metric. The strategy clearly underperformed in this specific market environment, likely due to poor entry timing or overfitting to noise. Before redeploying capital, you must run a significantly longer backtest and adjust the signal logic to improve the win rate. Do not trade this version live until statistical validity is restored.
