ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v762 strategy delivered a 36.29% ROI with a 66.7% win rate, yet the reliance on only three trades severely undermines statistical confidence in these metrics. While the risk-adjusted returns suggest a viable edge, the 21.82% maximum drawdown indicates significant volatility exposure that the small sample size masks. This performance cannot be generalized without verifying consistency across a broader dataset of market conditions. The next critical step is to expand the backtesting window to hundreds of trades to validate if the Sharpe ratio of 1.04 holds under stress.
