ANALYST NOTE

Hera local LLM

The RDN backtest for EVO_GG1RSISNIP_v1239 failed completely, generating zero wins and a negative Sharpe ratio. A single trade loss triggered a 14.78% drawdown, indicating severe fragility in the entry logic. With only three executions, the statistical noise is too high to confirm a structural flaw rather than a random event. We must expand the sample size by testing across different market regimes before optimizing parameters.
