ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1304 strategy on VOXR failed to generate value, recording a negative ROI of -2.01% and a Sharpe ratio of -0.05. With only three trades executed, the 33.3% win rate and 11.32% maximum drawdown are statistically insignificant and likely reflect overfitting rather than market inefficiency. The capital erosion to \$9,801.86 suggests the entry logic lacks robustness in the current volatility regime. Increasing the sample size through a broader parameter sweep is the immediate priority before redeployment.
