ROI	Sharpe	Win Rate	Max Drawdown
-2.01%	-0.05	33.3%	-11.32%

EQUITY CURVE202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1317 strategy on VOXR failed to generate alpha, delivering a -2.01% ROI and a negative Sharpe ratio of -0.05 across only three trades. With a meager sample size of three executions, the 33.3% win rate and 11.32% maximum drawdown are statistically insignificant and prone to high variance. The strategy lacks robustness, as minimal trade volume prevents any reliable assessment of its risk-adjusted performance or consistency. Immediate next steps require expanding the backtest to a longer historical window or optimizing entry filters to improve trade frequency before deployment. This analysis serves educational purposes and does not constitute investment advice.
