ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1343 backtest on META yielded a catastrophic -17.50% return with a 0.0% win rate and a 33.28% maximum drawdown. Only three trades executed during the simulation period are insufficient to generate statistically significant confidence in the strategy's viability. The data indicates a severe underperformance where the logic failed completely rather than showing a distribution of results. We must immediately suspend live deployment pending a review of the entry conditions to prevent further capital erosion.
