ANALYST NOTE

Hera local LLM

The HIG GG3_MACD_Momentum backtest failed completely, producing zero winning trades and a 19.47% drawdown with a negative Sharpe ratio of -1.55. The strategy generated only four trades, a sample size too small to establish statistical significance or validate any pattern. Momentum signals clearly failed to capture the recent market regime, resulting in a total loss of capital relative to the starting point. We must pause deployment and re-examine the entry thresholds to filter out false breakouts before considering a revised approach.
