ANALYST NOTE

Hera local LLM

The DOGE/USD momentum test failed catastrophically with a -13.68% return, zero winning trades, and a negative Sharpe ratio of -0.83. Only two trades executed over 24/7 coverage create a statistically insignificant sample size that cannot validate the strategy's edge. The 20.78% drawdown suggests the momentum logic is highly sensitive to DOGE's current volatility, likely triggering premature exits. We must discard this parameter set immediately and re-evaluate the entry filters using a longer historical period to ensure robustness.
