ANALYST NOTE

Hera local LLM

The EVO_WEBIDEA_v1999 strategy failed on VOXR with a -2.01% ROI and -0.05 Sharpe, driven by only three trades yielding a 33.3% win rate. Statistical significance is absent given the tiny sample size, rendering the -11.32% drawdown unreliable for risk modeling. The negative Sharpe confirms a net loss of capital relative to volatility, indicating broken expectancy in this specific parameter set. I will re-run the backtest with tighter stop-loss logic to filter out low-probability entries before deployment. This analysis remains educational and does not constitute a recommendation to trade.
