ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1540 strategy on RDN failed catastrophically, losing 5.59% with a 14.78% drawdown after only three trades. A zero win rate and negative Sharpe ratio indicate the logic was completely misaligned with current price action. Such a tiny sample size offers no statistical confidence, making the result an outlier rather than a systemic flaw. We must reject this signal logic immediately and backtest a revised entry filter on a larger dataset to validate robustness.
