ANALYST NOTE

Hera local LLM

The EVO_EVOVOGG1R_v1656 strategy on GOOGL generated a +6.75% return, yet the 33.3% win rate and low 0.54 Sharpe ratio suggest a flawed risk-reward profile. With only three trades executed, the statistical confidence in these results is negligible, and the 15.79% drawdown highlights significant capital volatility. The strategy failed to capture the asset's broader trend, likely due to overly conservative or misaligned entry filters. Next, backtest the same logic on a higher timeframe like weekly candles to verify if the signal logic holds outside this narrow sample. Remember, this analysis is educational and does not constitute investment advice.
