ANALYST NOTEHera local LLM

The EVO_EVOEVOEVOE_v2030 strategy on VOXR failed to generate alpha, recording a -2.01% drawdown with a negative Sharpe ratio of -0.05. With only three trades executed, the statistical sample is too small to confirm any pattern or validate the logic. The 33.3% win rate indicates the entry filters likely missed the primary trend direction during this specific period. Future iterations must incorporate higher volatility filters to avoid counter-trend entries in low-liquidity environments. Further parameter tuning is required before deploying live capital to this specific asset class.
