ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v2110 strategy on RDN failed catastrophically, recording zero winning trades and a -5.59% return over only three executions. Such a tiny sample size renders the negative Sharpe ratio of -0.31 and 14.78% drawdown statistically insignificant and unrepresentative of true performance. The total loss of capital to \$9,440.84 suggests either flawed entry logic or extreme slippage in low-liquidity conditions. Immediate re-evaluation of the signal generation parameters is required before redeploying this bot live.
