

Backtest #56390 · VOXR · VOXR · GG1_RSI_Sniper (autotrade)

ROI	Sharpe	Win Rate	Max Drawdown
-2.01%	-0.05	33.3%	-11.32%

EQUITY CURVE202 sessions · starting at \$9997.00

ANALYST NOTE

Hera local LLM

The VOXR GG1_RSI_Sniper backtest reveals a statistically insignificant sample size of only three trades, rendering the -2.01% ROI and -0.05 Sharpe ratio unreliable indicators of performance. The 33.3% win rate suggests the RSI sniper logic failed to filter noise effectively, resulting in an 11.32% maximum drawdown that erodes confidence in the signal quality. Such a poor win rate combined with minimal trade volume indicates the current parameters are overfitting to historical noise rather than capturing genuine market alpha. The strategy requires immediate parameter refinement or a complete logic overhaul before any live deployment is considered.
