ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v1824 strategy on LPG achieved a 41.35% ROI, yet the 66.7% win rate is statistically insignificant given only three total trades. A maximum drawdown of 21.82% combined with a Sharpe ratio of 1.13 suggests high volatility and insufficient sample data to confirm robustness. We cannot validate the edge without expanding the dataset through a longer simulation or different market conditions. The next step is to run a walk-forward analysis to verify if the strategy adapts beyond this narrow sample.
