ANALYST NOTE

Hera local LLM

The EVO_EVOWEBIDEA_v409 backtest on VOXR failed, delivering a -2.01% return with a negative Sharpe ratio of -0.05. Only three trades occurred, creating a sample size too small to determine statistical significance or generalizability. The strategy lost money on roughly two-thirds of its attempts while suffering an 11.32% peak drawdown. Given the lack of data points, any conclusion about viability is purely speculative at this stage. The immediate next step is to run a longer backtest on a wider date range to gather sufficient trade samples.
