ANALYST NOTE

Hera local LLM

The EVO_EVOGG1RSIS_v441 strategy on VOXR failed to generate alpha, delivering a -2.01% ROI and a negative Sharpe ratio of -0.05. With only three trades, the sample size is statistically insignificant, rendering the 33.3% win rate and 11.32% drawdown unreliable indicators of future performance. The strategy lacks sufficient robustness for institutional deployment given the extreme volatility and lack of statistical power in this specific simulation. We must expand the test horizon or adjust parameters to validate edge before allocating capital to this setup.
