ANALYST NOTE

Hera local LLM

The LINK/USD GG3_MACD_Momentum strategy exhibits severe underperformance with a negative ROI of -17.39% and a Sharpe ratio of -0.89, indicating consistent capital erosion. The zero win rate across four trades confirms a complete lack of statistical confidence, rendering the sample size too small to validate any edge. Max drawdown reached 18.94%, highlighting excessive risk exposure without corresponding upside. The primary failure stems from the momentum signal triggering entries in adverse market conditions. Implement a strict minimum trade count threshold before live deployment to ensure robust statistical significance.
