ANALYST NOTE

Hera local LLM

The +87.88% return on AMD is entirely driven by two trades, making the 1.61 Sharpe ratio and 50% win rate statistically meaningless for predictive purposes. This sample size offers zero confidence in the strategy's robustness or risk-adjusted performance. The 26% drawdown is significant relative to the tiny trade count, indicating high variance per position. You need at least 100 trades before evaluating this logic.
