ANALYST NOTE

Hera local LLM

The LPG backtest for EVO_EVOEVOEVOE_v1835 shows a 46.76% ROI with a 1.23 Sharpe ratio, but the sample of only three trades is statistically insignificant and prone to overfitting. While the strategy captured sufficient upside, a 20.33% drawdown highlights substantial volatility risk relative to the limited trade count. The high win rate of 66.7% may reflect luck rather than robust edge given the minimal data points. I recommend running a walk-forward analysis on a larger dataset to validate performance stability before live deployment.
