ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v326 strategy on VOXR failed decisively, registering a -2.01% ROI and a negative Sharpe of -0.05 across only three trades. A win rate of 33.3% and an 11.32% drawdown indicate severe overfitting rather than a robust alpha signal. With such a small sample size, statistical confidence is negligible, rendering any performance metrics meaningless for live deployment. We must immediately discard this parameter set and retest with a different timeframe or asset class to validate the logic.
